1. The following is an examiner's statement of reasons for allowance:

the art of record fails to teach or suggest, in a method, an apparatus or an article having a processor and a computer-readable storage medium, an EAS deactivator comprising a zero crossing circuit to detect zero crossings of an AC input voltage waveform, and generate a first signal to represent the zero crossings; a processor to retrieve a plurality of delay times, and generate a second signal using the first signal and the delay times; and a coil circuit to use the second signal to deactivate an EAS marker using phase control of the AC input voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The IDS filed 4/8/05 has been considered; the Copeland reference was crossed out, since it had been previously made of record by the examiner.
